ELECTRICAL AND
AUTOMATION
SOLUTIONS
PROVIDER**

About Our Business

"Greenro Solutions is a professional end-to-end **Electrical and Automation** solutions provider. We provide solutions that cut across industry verticals. Our highly qualified and experienced personnel provide our partners with high quality solutions that add value. These solutions are engineered with **People** at the center.

We particularly focus on assisting SMMEs (Small, Medium and MicroSized Enterprises) to pivot and be more successful.

Values

Our values are premised on putting people at the center of what we do. We believe that everything we do must have a positive impact for the human population.

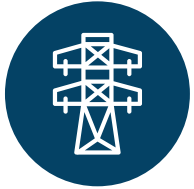

We believe that:

- **Details** Matter: We have a high attention to detail, striving for absolute best quality in everything we do.
- Outmost **Respect** for Everyone: Anyone who comes into contact with us will always be treated with the highest respect.
- The "Business" Is **Us**: Our "business" is made up of all of us. Whenever we refer to "the business", we refer to all of us.
- We are **Ubuntu**: I am because We Are. We will succeed together for everyone, because of everyone.
- One Way Only: **Professional**: We carry ourselves with the highest professional standards, and this also shows in our work.

Reporting

**ENGINEERING,
MANUFACTURING
INSTALLATION,
MAINTENANCE AND
PROJECT MANAGE-
MENT SERVICES**

Services Offering

DIESEL POWER GENERATORS

Backup diesel power generator solutions, inclusive of standby power, and base load power for all industry applications. These solutions are available in open set, canopy, containerize, or special build configurations.

SUBSTATIONS

Development of power distribution substation switchgear and protection systems that support municipalities and utility companies with infrastructure development.

PLANT AUTOMATION AND CONTROL SYSTEMS

Control systems designed to improve plant efficiency and performance through the application of intelligent instrumentation, controllers, and industrial software applications.

TELEMETRY SYSTEMS (REMOTE MONITORING AND CONTROL)

Remote monitoring and control of systems and infrastructure through telecommunications technologies that include, GSM, 3G, Satellite, Microwave, and Radio.

MV/LV ELECTRICAL RETICULATION AND DISTRIBUTION

Providing the 'blood stream' of electrical infrastructure through MV/LV cabling, which includes specialized cabling installations, switchgear, distribution transformers and components..

INDUSTRIAL NETWORKS

Develop robust industrial communications network technologies such as Profinet, Profibus, Ethernet, and Modbus, that support essential systems communications.

INDUSTRIAL WIRELESS NETWORK SYSTEMS

Wireless solutions that allow quick implementation of point-to-point and multipoint connectivity through radio and microwave technologies.

A large background image showing the silhouette of a worker on a high-voltage power transmission tower. The worker is positioned on a cross-arm, and the tower's lattice structure is clearly visible. The background is a dramatic sky at sunset or sunrise, with warm orange and yellow hues near the horizon and cooler blue tones above. In the top right corner, there is a decorative graphic of several overlapping circles in shades of green and blue, some with internal patterns.

**Solutions Engineered
For People**

Solutions Process

DESIGN

SOLUTIONS

- Elicit Business Requirements
- Develop a technical and commercial proposal
- Deliver a conceptual design
- Prepare a detailed design

BUILD

SOLUTIONS

- Procurement
- Manufacturing
- Installation
- Commissioning and Certification

MONITOR & MAINTAIN

SOLUTIONS

- Routine Maintenance
- Early Warning Systems
- Reactive Maintenance

ADVISORY/ CONSULTING

SOLUTIONS

- Site Assessments/Studies
- Site Reports
- Compliance Reports

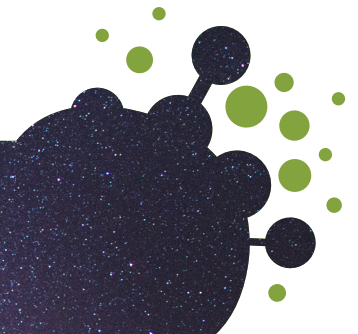

**A PROVEN
END-TO-END
SOLUTIONS
PROCESS**
